Email: dev@kushalshah.com.np

Kathmandu, Nepal

EDUCATION

- **IOE Thapathali Campus** Kathmandu, Nepal
Bachelor of Computer Engineering – Aggregate Percentage: **79.11%** (Semesters 1–5 completed) *Feb 2023 – Present*
- **Makawanpur Multiple Campus** Hetauda, Nepal
ISC (+2) – Science with Computer – [GPA 3.50] *2020 – 2022*
- **Mount Everest Secondary School** Simara, Nepal
SLC (Grade 10) – [GPA 4.0] *2020*

EXPERIENCE

- **Full Stack Developer – Freelance** Remote
Independent *2020 – Present*
 - **Web Development:** Designed and delivered end-to-end web applications for clients using React, Node.js, and MongoDB, handling everything from UI to backend APIs and database design.
 - **Project Management:** Managed the full project lifecycle – requirements gathering to deployment – while balancing university commitments, demonstrating strong time management and client communication skills.
- **Open Source Contributor** Remote
Open Source Community *2021 – Present*
 - **Collaboration:** Contributed to open-source repositories, gaining hands-on experience with code review, pull request workflows, and collaborative software development across global teams.

PROJECTS

- **Password Manager:** Full-stack password manager with encrypted storage, secure authentication, and password generation, built using the MERN stack (MongoDB, Express, React, Node.js).
- **CookieVault – Session Management:** Secure cookie and session management system built with Next.js, TypeScript, and MongoDB, implementing authentication and modern encryption best practices.
- **TeleVault – Telegram Cloud Storage:** File storage system via Telegram bots with a full web UI for upload and retrieval, built with Node.js and the Telegram Bot API. Cost-efficient and scalable through creative API integration.
- **NeuraMind – AI Chat Assistant:** Real-time streaming AI chat interface with session management and syntax highlighting, built with React, Vite, and Tailwind. Designed a scalable frontend architecture for LLM-based applications.
- **SharePulse – NEPSE Stock Tracker:** Real-time Nepal Stock Exchange (NEPSE) monitoring dashboard with dynamic charts and portfolio tracking, built with React and Node.js.
- **HTTP Server – Systems Programming:** Built a fully functional HTTP server from scratch in C++ using TCP sockets, covering concurrency handling and HTTP protocol design. Demonstrates strong understanding of low-level backend and networking concepts.

PROGRAMMING SKILLS

- **Languages:** JavaScript, TypeScript, Python **Frontend:** React.js, Next.js, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs **Databases:** MongoDB, PostgreSQL, Firebase
- **Tools:** Git, Docker, Postman, Vercel, Netlify **Stack:** LAMP, MERN (Full Stack)
